Profile Summary

Final year B.Tech CSE student with hands-on experience in full-stack web development using Java, Spring Boot, React.js, MySQL, and Redis. Skilled in building REST APIs, authentication systems, database-driven applications, and cloud-deployed applications using Docker, Render, and Vercel. Strong problem-solving skills with 700+ coding problems solved across competitive programming platforms.

Education

Bundelkhand Institute of Engineering and Technology, Jhansi

2023 – 2027

B.Tech – Computer Science and Engineering — CGPA: 8.31

Jhansi, Uttar Pradesh

Projects

DropIt — Temporary File Sharing Platform | *Spring Boot, React.js, Redis, Docker* | [Live Demo](#)

May 2026

- Engineered a full-stack temporary file sharing platform supporting secure transfer of files up to 1GB through unique share-code based access.
- Reduced file retrieval latency by nearly 30% using Redis in-memory caching and optimized REST API communication for temporary file operations.
- Deployed a containerized cloud architecture on Render and Vercel with automated file expiration and scalable concurrent upload/download handling.

Alumni Management System | *JSP, Servlets, MySQL, BCrypt, JDBC*

Apr 2025

- Created role-based modules for Admin, Alumni, and Students with secure authentication and account verification workflows.
- Integrated job referral, alumni verification, and event management features to improve platform engagement and communication.
- Managed relational database operations using JDBC and MySQL for user records, approvals, and activity management.

Hospital Management System | *JSP, Servlets, MySQL, BCrypt, JDBC*

Dec 2024

- Built a hospital management portal for handling patient records, appointments, billing, and staff operations.
- Integrated secure login and access control mechanisms using Servlets, sessions, and BCrypt authentication.
- Designed normalized MySQL schemas and JDBC workflows for efficient appointment and record management.

Technical Skills

Languages: Java, JavaScript, Python, C

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Bootstrap, Vite

Backend: Spring Boot, Node.js, Express.js, Java Servlets, JSP, Langchain

Databases: MySQL, PostgreSQL, MongoDB, Redis

Developer Tools: Git, GitHub, Docker, VS Code, IntelliJ IDEA, Eclipse

Core Concepts: REST APIs, OOP, MVC Architecture, JDBC, Authentication & Authorization, RBAC, SDLC

Competitive Programming: 700+ problems solved across LeetCode, GeeksforGeeks, and Codeforces

Certifications

Supervised Machine Learning: Regression and Classification – Coursera (Andrew Ng, DeepLearning.AI) | Topics:

Linear/Logistic Regression, Gradient Descent, Feature Engineering

Achievements

GATE CS/IT 2026 – AIR 5159

Hackathon Winner – 1st Place, IIC Hackthon(BIET Jhansi): built a alumni management system in 48 hours.

2× Coding Competition Winner – Secured 1st place twice in CodersCup Competitive Coding Competition organized by CoSSCo Club, BIET Jhansi.
